**Bayview Construction receives national award for  
Stuart project**

*Award honors the best in industrial construction*

STUART, FL (November 10, 2010) – Stuart-based Bayview Construction Corporation has won a national award for a project in Stuart, Florida completed earlier this year.

Ken Ringe, president of Bayview Construction, was notified last week by the National Commercial Builders Council (NCBC) that his company would receive the Chairman’s Award for its entry, Snake Road Auto Salvage and Everett Brothers Recycling, within the Industrial Division, in NCBC’s 2011 Awards of Excellence competition.

“This award marks the 6<sup>th</sup> Awards of Excellence Bayview has won,” said Ringe. “We’re especially proud of this one because it proves, even a construction project for a business that works with salvage and recycling, can incorporate ‘green’ and sustainable elements, which all provide some return on investment while helping the environment.”

Snake Road Auto Salvage, completed by Bayview Construction in April 2010, is the newest and one of the most modern automobile salvage facilities on Florida’s East Coast. The center processes vehicle parts and provides a low-cost option to customers, who range from automotive body shops, mechanical shops, automobile dealerships, insurance companies, and the “do-it-yourself” mechanic.

Energy-efficient features used in the project included sun-reflective materials on the building’s rooftop, energy efficient florescent fixtures and lighting in all interior offices, installation of instant hot water heaters, and use of R-30 rated insulation in ceilings with R-19 in the walls, and installation of florescent full bodied high bay industrial lighting to produce high-light output with a minimum footprint to delivery compact, powerful and efficient light source necessary for safety and productivity.

The center’s recycling process includes draining all fluids before processing. More than 10,000 gallons in gasoline are recovered per year, along with 4,000 gallons of engine oil, which is filtered and reused. Other fluids recovered and rebottled for resale are transmission fluid and antifreeze.

The project team included: Derek Sanders and Associates, architectural services; Engineering Design and Construction, Inc., civil engineering; Cotleur Hearing, landscape architecture; and The Shaffer Group, Inc., mechanical, electrical and plumbing engineering.

The NCBC Awards of Excellence Program recognizes achievements in the commercial and industrial building industry for design (remodeling and new construction), market appeal, energy efficiency, challenges faced during building and overall project success. The awards program is sponsored by the National Commercial Builders Council (NCBC).

Snake Road Auto Salvage will be featured along with other winners in the winter issue of Commercial Builder Magazine, and at "NBN On-Line," Nation's Building News, which is the official e-newspaper of the NAHB.

Bayview Construction, headquartered in Stuart, Florida is a certified state-licensed general contractor. A national award-winning company in construction and safety, and a Treasure Coast Builders Association Builder (TCBA) of the Year award recipient, Bayview has been in operation for more than 32 years.
