To Whom It May Concern:

The Pine School chose Bayview Construction to build our lower school kitchen based on their reputation in the community. Bayview came to the table with a history of completing jobs ahead of schedule and below budget. Bayview did not disappoint us. I am very pleased to say that Bayview worked very diligently with all of the committees and owner vendors involved with this project and made everything work to the benefit of the school. I would recommend Bayview to anyone who is looking for a company that stands by their word and is nothing but professional in every aspect of their job. If the opportunity arises in the future, The Pine School and I would hire Bayview Construction again. If any additional information is needed, please do not hesitate to contact me.

Yours faithfully,

Larry W. Pittman
Business Manager
The Pine School
